S4835-2.1-F

NEBRASKA 1984
PRELIMINARY COUNTY ESTIMATES
and
STATE AGRICULTURAL DATA

CROPS, LIVESTOCK, PRICES, FARM INCOME, FARMS, IRRIGATION, AND FERTILIZER STATISTICS

This publication is prepared to provide Nebraska county and State data on selected agricultural items that are most needed by agricultural data users. These data, along with many additional statistical series by counties and for the State, will be issued in printed form later in the year. NEBRASKA AGRICULTURAL STATISTICS, the printed publication, will also include revised county and State estimates for 1983. The county estimates of value of crop production for 1983 will be published at the same time. Value estimates for crops by counties for 1984 will not be prepared until the end of the crop marketing year. Preliminary estimates of State prices of crops produced in 1984 are shown in this report in the annual Crop Summary table.

Only a limited number of copies of this issue are prepared for distribution. In addition, a supply of hand-outs for the individual tables is available for distribution to those interested in only one or a few items.

Requests for Nebraska agricultural data not appearing in this publication should be sent to the Nebraska Crop and Livestock Reporting Service, P.O. Box 81069, Lincoln, Nebraska 68501.

Preface
Statistical Methods
Nebraska Annual Crop Summary, 1982-1984
U.S. Acreage, Yield, Production and Value, 1982-1984
Corn for All Purposes, Corn for Grain, by Counties, 1984
Corn, Irrigated and Non-Irrigated, by Counties, 1984
Sorghum for All Purposes, Sorghum for Grain, by Counties, 1984
Sorghum, Irrigated and Non-Irrigated, by Counties, 1984
All Soybeans, by Counties, 1984
Soybeans, Irrigated and Non-Irrigated, by Counties, 1984
Wheat: All Wheat, Irrigated Wheat, by Counties, 1984
Wheat: Summer Fallow and Other Dry Land, by Counties, 1984
Oats, by Counties, 1984
Barley, by Counties, 1984
Dry Beans and Sugar Beets, by Counties, 1984
All Hay, by Counties, 1984
All Alfalfa Hay, by Counties, 1984
Alfalfa Hay, Irrigated and Non-Irrigated, by Counties, 1984
Wild Hay, by Counties, 1984
Other Hay, by Counties, 1984

Irrigation Statistics, by Counties, 1980-1984

Number of Farms, by Counties, 1979-1984

Tonnage Report of Commercial Fertilizer Sold, by Counties, 1984

Rye, by Districts, 1983 and 1984

Sheep Inventory Numbers and Value, by Districts, January 1, 1984 and 1985

Nebraska and U.S. Annual Livestock and Poultry Summary, 1981-1985; Nebraska Livestock and Poultry by Classes, 1982-1985; Nebraska Cattle and Calves on Feed, by Quarters, 1979-1985; Number of Livestock Farms, Nebraska and U.S., 1976-1984

Milk Cows, Beef Cattle, Other Cattle, All Cattle, Inventory Numbers and Value, by Counties, January 1, 1985
All Cows and Heifers that have Calved and Number of Calves Born, by Counties, 1984
Milk Cow Inventory and Milk Production, by Counties, 1984
Cattle Placed on Feed, Selected Years, 1970-1984, by Counties
Number of Feedlots by Size Groups and Number of Fed Cattle Marketed, Nebraska and Selected States, 1980-1984, and 13 States Total, 1980-1984
Hog Inventory Numbers and Value, by Counties, December 1, 1984
Sows Farrowed and Pigs Saved, by Counties, 1984

Nebraska and U.S. Cash Receipts from Farm Marketings, Crops and Livestock, Government Payments, Gross and Net Farm Income, 1977-1983

Prices Received by Farmers, by Months; Average Prices Paid by Farmers for Feed, by Months, 1984

PREFACE

Information in this statistical summary of Nebraska agriculture is the result of thousands of voluntary reports from farmers, ranchers and agribusiness firms. Much of the detail needed for county estimates was collected from farmers and ranchers by mail with the Annual Agricultural Survey and acreage and livestock surveys. County extension staff, local lending institutions and the National Weather Service have also contributed through weekly reports on weather and crops. The excellent cooperation from all the above mentioned and other State, University and USDA agencies is very much appreciated.

The Nebraska Department of Agriculture and the United States Department of Agriculture cooperate in collecting and compiling these agricultural statistics. Under this cooperative agreement, the Nebraska Crop and Livestock Reporting Service publishes over 100 statistical reports annually covering most Nebraska agricultural commodities.

Free distribution of our state office releases during the year are limited to individuals and firms that provide information on the surveys made from this office and their respective National headquarters. State and local governmental agencies providing survey check data will also be eligible to receive free copies. Others wishing to receive releases may obtain them by paid subscription through the Nebraska Department of Agriculture, Division of Agricultural Statistics.

To request current reports issued during the year or copies of this report write Chuck Schroeder, Director, Nebraska Department of Agriculture, 4th Floor 301 Centennial Mall South, P.O. Box 94947, Lincoln, Nebraska 68509, or Jack Aschwege, State Statistician, P.O. Box 81069, Lincoln, Nebraska 68501.

STATISTICAL METHODS

GENERAL

The Nebraska Crop and Livestock Reporting Service has two primary objectives:

1. To develop accurate, reliable agricultural statistics.
2. To move those statistics to users as rapidly as possible.

Data collection to achieve these objectives involves sample surveys of farmers and ranchers, grain companies and elevators, auctions, packing plants, retail stores, and many other agricultural enterprises.

From data reported by these many sources, statisticians, using all available statistical tools, generate State totals forming official State and USDA estimates. Cooperation of USDA and the Nebraska Department of Agriculture provides resources for breaking State totals into crop reporting districts and counties.

Analysis and interpretation of these basic statistics are performed by others, such as University of Nebraska Extension Specialists, private economists, and the producer. Our role is to provide basic data and every effort within available resources is made to provide accurate and timely information. This process begins with survey design and continues through data collection, summarization, analysis and finally the release of each crop and livestock statistic.

STATE ESTIMATES

The U.S. Department of Agriculture is required by law to provide National crop and livestock statistics for each major producing State.

For many years and to a considerable extent today, mailed non-probability surveys served as the backbone of data gathering. However, probability sampling, a more sophisticated sampling procedure, is being incorporated as funds and applied technology allow. Some types of probability sampling used in Nebraska are Area Frame Sampling, List Frame Sampling, and Multiple Frame Sampling. Sampling farm operators in a specifically outlined geographic area is known as Area Frame Sampling, while sampling a list of all known producers of a specific commodity is known as List Frame Sampling. A technique called Multiple Frame Sampling takes advantage of the attributes of both the Area and List samples. Area Frame Sampling is used in Nebraska for most acreage and livestock items and Multiple Frame Sampling is used for estimating livestock and grain stocks inventories.

The concept of probability sampling is maintained in all three types of sampling. Data collection for the probability surveys involves personal enumeration and telephone or personal followup for all non-respondents to mail questionnaires. These probability surveys are expensive on a per sampling unit basis but yield State results that have greater precision and allow measurement of the sampling error.

Nebraska's major crops (corn, soybeans, wheat and sorghum) are measured by objective yield procedures. Forecasts before harvest incorporate plant counts, kernel and head counts and weight. Sample fields are entered with permission of growers, by enumerators from May through October to take counts and measurements during the growing season. After harvest, gleaning provides estimated harvesting loss. Monthly crop reporters give dependable mail survey yield indications during the season.

COUNTY ESTIMATES

Federal appropriations and regulations support State estimates for specific agricultural items that are important in National totals. When additional items or geographic descriptions within States are needed, supplemental funding is required. To provide estimates by county, for example, requires a much larger sample because each county must have enough reports to provide a sound basis for estimates. Our acreage surveys and Annual Agricultural Survey give every operator a chance to report annually and provides a solid basis for county estimates.

CHECK DATA

In addition to producer surveys, check data are collected from the marketing channels, county extension agents, ASCS, etc., to verify or supplement the grower survey data. These data become available -- usually long after harvest and are used to establish final production and marketing figures.

The final estimate is arrived at when all grower survey data and marketing data (check data such as: handler or processor receipts, slaughter, and market shipments) have been analyzed. These data then become the statistical history against which current forecasts and estimates are viewed.

NEBRASKA 1983
COUNTY ESTIMATES
and
STATE AGRICULTURAL DATA

SUPPLEMENT to 1984 Preliminary County Estimates--Issued July 1985

Due to budget cuts adopted by the State Legislature for the Division of Agricultural Statistics in this Fiscal Year, the annual NEBRASKA AGRICULTURAL STATISTICS book for 1983-84 will not be published. Other adjustments in the publication of State and county data will occur in 1986.

This special publication is prepared to provide Nebraska county and State data for 1983 on selected agricultural items that were deemed most needed by agricultural data users. The 1983 crop and livestock county and State estimates and value of crop production are included. A few summary commodity tables were reprinted from the 1984 Preliminary County Estimates publication and former Nebraska Agricultural Statistics book for reference purposes and continuity.

Only a limited number of copies of this issue were prepared for distribution. A supply of hand-outs for the individual tables is available for distribution to those interested in only a few items.

Requests for Nebraska agricultural data not appearing in this publication should be sent to the Division of Agricultural Statistics, P.O. Box 81069, Lincoln, Nebraska 68501.

NEBRASKA -- RANK IN AGRICULTURE

RANK:	
1st	Alfalfa meal production, 1984. Tons -- 486,500.
1st	Great Northern beans production, 1984. Cwt. -- 2,132,000.
2nd	Cash receipts from cattle and calves, 1984. $3,666,000,000.
2nd	Fed cattle and calves marketed, 1984. Number -- 4,220,000.
2nd	All cattle and calves, January 1, 1985. Number -- 6,100,000.
2nd	Cattle on feed, January 1, 1985. Number -- 1,880,000.
2nd	Sorghum silage production, 1984. Tons -- 700,000.
2nd	Dry edible beans production, 1984. Cwt. -- 3,230,000.
3rd	Cash receipts from all livestock marketings, 1984. $4,523,000,000.
3rd	Commercial cattle slaughter, 1984. Number -- 5,316,300.
3rd	Commercial cattle slaughter (live weight), 1984. Thousand lbs. -- 5,788,118.
3rd	Commercial livestock slaughter, all species, 1984. Thousand lbs. -- 6,736,270.
3rd	Commercial red meat production, 1984. Thousand lbs. -- 4,090,680.
3rd	Sorghum grain production, 1984. Bushels -- 121,600,000.
3rd	Corn for grain production, 1984. Bushels -- 799,250,000.
3rd	Cash receipts from corn, 1984. $1,344,000,000.
3rd	Cash receipts from sorghum grain, 1984. $191,000,000.
4th	Value of all cattle and calves on farms, January 1, 1985 -- $2,501,000,000.
4th	Beef cows and heifers that have calved, January 1, 1985. Number -- 1,808,000.
4th	Pinto beans production, 1984. Cwt. -- 882,000.
4th	Land in farms and ranches, 1984. Acres -- 47,200,000.
4th	Cash receipts from farm marketings, 1984. $7,082,000,000.
5th	Capacity of commercial grain storage facilities, January 1, 1985. Bushels -- 679,890,000.
5th	Calves born, 1984. Number -- 1,800,000.
5th	All hogs and pigs, December 1, 1984. Number -- 3,700,000.
5th	Value of all hogs and pigs on farms, December 1, 1984 -- $297,850,000.
5th	Cash receipts from hogs and pigs, 1984. $635,000,000.
5th	Rye production, 1984. Bushels -- 1,334,000.
5th	Commercial hog slaughter, 1984. Number -- 4,112,300.
6th	Corn silage production, 1984. Tons -- 5,110,000.
6th	All hay production, 1984. Tons -- 7,535,000.
6th	Alfalfa hay production, 1984. Tons -- 5,120,000.
6th	All other hay (includes wild) production, 1984. Tons -- 2,415,000.
6th	Pigs saved, 1984. Number -- 5,615,000.
6th	Value of principal crops produced, 1984. $3,558,918,000.
6th	Sugar beets production, 1984. Tons -- 1,480,000.
6th	Cash receipts from sugar beets, 1984. $54,000,000.
7th	Winter wheat production, 1984. Bushels -- 81,000,000.
7th	Harvested acreage, principal crops, 1984. Acres -- 18,564,000.
7th	Cash receipts from crops, 1984. $2,559,000,000.
8th	Oats production, 1984. Bushels -- 15,000,000.
9th	Value of farm real estate, 1984. $23,562,000,000.
9th	Cash receipts from soybeans, 1984. $444,000,000.
10th	Sheep and lambs on feed, January 1, 1985. Number -- 65,000.
10th	Soybean production, 1984. Bushels -- 63,750,000.
10th	Cash receipts from wheat, 1984. $341,000,000.
12th	All wheat production, 1984. Bushels -- 81,000,000.
16th	All potato production, 1984. Cwt. -- 2,790,000.
17th	Wool production, 1984. Pounds -- 1,455,000.
17th	Value of wool production, 1984 -- $888,000.
17th	All sheep and lambs, January 1, 1985. Number -- 165,000.
20th	Turkeys, pounds produced, 1984. Pounds -- 12,141,000.
20th	Turkeys raised, 1984. Number -- 639,000.
21st	Barley production, 1984. Bushels -- 2,574,000.
23rd	Value of all chickens on hand December 1, 1984. $9,000,000.
26th	Eggs produced, Dec. 1, 1983-Nov. 30, 1984. Number -- 773,000,000.
27th	All chickens, December 1, 1984. Number -- 4,000,000.

PREFACE

Information in this statistical summary of Nebraska agriculture is the result of thousands of voluntary reports from farmers, ranchers and agribusiness firms. Much of the detail needed for county estimates was collected from farmers and ranchers by mail with the Annual Agricultural Survey and acreage and livestock surveys. County extension staff, local lending institutions and the National Weather Service have also contributed through weekly reports on weather and crops. The excellent cooperation from all the above mentioned and other State, University and USDA agencies is very much appreciated.

The Nebraska Department of Agriculture and the United States Department of Agriculture cooperate in collecting and compiling these agricultural statistics. Under this cooperative agreement, the Nebraska Crop and Livestock Reporting Service publishes over 100 statistical reports annually covering most Nebraska agricultural commodities.

Free distribution of our state office releases during the year are limited to individuals and firms that provide information on the surveys made from this office and their respective National headquarters. State and local governmental agencies providing survey check data will also be eligible to receive free copies. Others wishing to receive releases may obtain them by paid subscription through the Nebraska Department of Agriculture, Division of Agricultural Statistics.

To request current reports issued during the year or copies of this report write Chuck Schroeder, Director, Nebraska Department of Agriculture, 4th Floor 301 Centennial Mall South, P.O. Box 94947, Lincoln, Nebraska 68509, or Jack Aschwege, State Statistician, P.O. Box 81069, Lincoln, Nebraska 68501.

STATISTICAL METHODS

GENERAL

The Nebraska Crop and Livestock Reporting Service has two primary objectives:

1. To develop accurate, reliable agricultural statistics.
2. To move those statistics to users as rapidly as possible.

Data collection to achieve these objectives involves sample surveys of farmers and ranchers, grain companies and elevators, auctions, packing plants, retail stores, and many other agricultural enterprises.

From data reported by these many sources, statisticians, using all available statistical tools, generate State totals forming official State and USDA estimates. Cooperation of USDA and the Nebraska Department of Agriculture provides resources for breaking State totals into crop reporting districts and counties.

Analysis and interpretation of these basic statistics are performed by others, such as University of Nebraska Extension Specialists, private economists, and the producer. Our role is to provide basic data and every effort within available resources is made to provide accurate and timely information. This process begins with survey design and continues through data collection, summarization, analysis and finally the release of each crop and livestock statistic.

STATE ESTIMATES

The U.S. Department of Agriculture is required by law to provide National crop and livestock statistics for each major producing State.

For many years and to a considerable extent today, mailed non-probability surveys served as the backbone of data gathering. However, probability sampling, a more sophisticated sampling procedure, is being incorporated as funds and applied technology allow. Some types of probability sampling used in Nebraska are Area Frame Sampling, List Frame Sampling, and Multiple Frame Sampling. Sampling farm operators in a specifically outlined geographic area is known as Area Frame Sampling, while sampling a list of all known producers of a specific commodity is known as List Frame Sampling. A technique called Multiple Frame Sampling takes advantage of the attributes of both the Area and List samples. Area Frame Sampling is used in Nebraska for most acreage and livestock items and Multiple Frame Sampling is used for estimating livestock and grain stocks inventories.

The concept of probability sampling is maintained in all three types of sampling. Data collection for the probability surveys involves personal enumeration and telephone or personal followup for all non-respondents to mail questionnaires. These probability surveys are expensive on a per sampling unit basis but yield State results that have greater precision and allow measurement of the sampling error.

Nebraska's major crops (corn, soybeans, wheat and sorghum) are measured by objective yield procedures. Forecasts before harvest incorporate plant counts, kernel and head counts and weight. Sample fields are entered with permission of growers, by enumerators from May through October to take counts and measurements during the growing season. After harvest, gleaning provides estimated harvesting loss. Monthly crop reporters give dependable mail survey yield indications during the season.

COUNTY ESTIMATES

Federal appropriations and regulations support State estimates for specific agricultural items that are important in National totals. When additional items or geographic descriptions within States are needed, supplemental funding is required. To provide estimates by county, for example, requires a much larger sample because each county must have enough reports to provide a sound basis for estimates. Our acreage surveys and Annual Agricultural Survey give every operator a chance to report annually and provides a solid basis for county estimates.

CHECK DATA

In addition to producer surveys, check data are collected from the marketing channels, county extension agents, ASCS, etc., to verify or supplement the grower survey data. These data become available -- usually long after harvest and are used to establish final production and marketing figures.

The final estimate is arrived at when all grower survey data and marketing data (check data such as: handler or processor receipts, slaughter, and market shipments) have been analyzed. These data then become the statistical history against which current forecasts and estimates are viewed.
